Do any of you guys have Hulu streaming tv services? We do, and for the past week or so the streaming quality has been terrible! I don't know if it is just us or if Hulu is actually having issues, but I am getting tired of it.

That's the nature of the streaming beast. I don't have Hulu yet but thanks for the heads up. Have you contacted them yet to see exactly what the issue is?

I haven't but only because I am pretty sure that it is my internet service and not them. We only have one provider here at the moment and they absolutely stink!

Martin, not sure who your internet provider is but we've been having issues with our streaming services lately as well. We have Netflix rather than Hulu but we're still having problems. AT&T is our IP at the moment but we're seriously considering switching!
