Hi Wayne,
Not too long ago, Bill E. Sent you tweeters to try with Two PI speakers. I was wondering if you had a chance to evaluate them yet.
I really enjoy the PI one & two models. Never being content to leave well enough alone, I have "messed" with various tweeters. Just curious.
Steve

I did, and I thought they sounded great. Haven't measured them though, and I tend to favor measurements over subjective listening impressions. I can't see any reason they wouldn't measure well, but I still think that's an important step.
