Monsters University is coming out next week. I thought Monsters Inc was pretty cute and hope this sequel can live up to it. I'm thinking of taking my 3 year old to go see it too; she'd enjoy it.

Somehow I missed Monsters 2! I was dragged to see the first one, sure I would hate it, but I loved it. I know I want to see Monster University, since Nathan Filian is in it. He's my current crush. I'll have to quickly rent the one in the middle.

TheMother, Monsters University is Monsters Inc 2. There is not one in between the two. I would love to go see this one, but I will probably wait until it comes out on video.

I can understand the confusion TheMother, they put out so many sequels and they don't really number them anymore, so it's hard to tell what's what. I love the monster movies though. Everything about them is done very well.
