Is anyone still enjoying the music of Gregorian Masters of Chant in this modern age? I was actually amazed by the high quality sound of their albums when I listened to it on my home theater. I was always just singing along in the car.

Well, I never thought to run into another person that listened to Gregorian Chants! I have several albums. (Yes, I mean the old vinyl type.) I always listen to them with headphones. They're very uplifting but at the same time soothing, somehow.
