Is there a web link out there with schematics and diagrams for DIY'ers who want to build from scratch, including SET, SEP and PP.Dave

Jeez, you'd think there would be a list of links to tube amp schematics compiled somewhere, wouldn't you? I'll bet maybe there are some lists around, 'cause I know there are lists of simple solid state amp schematics and stuff like that. Tons of tube radio schematics are available from Rider too.Check the list of "interesting links" on the vintage audio forum. I remember seeing some schematics in some of the links there.

There used to be a nice site with a bunch of "generic" amp and preamp schmatics, but it dissapeared a few months ago. Haven't found anything like it since.Dave

Where was it? Did the entire website disappear or just the page with the schematics?
