Hi Wayne,

After considerations, I changed my idea and want to build 4pi's. I have two questions:

1. Is the woofer 2226H or 2226J or G ?
2. If I buy 4pi kits from you (including 2226, DE250,H290C and crossover), what will be the ship cost and custom duty to china?

Thank you!

The woofer is a JBL 2226H.

The best way to get shipping quotes is to put an item in the shopping cart and begin the checkout process. It will ask you for your address and use that to calculate shipping by several methods and shippers. It doesn't ask for payment information until after it has calculated shipping costs, so this is a good way to check prices.

There is also a freight forwarding service available that will save you a lot of money. You'll see that option when the shopping cart provides freight quotes. Be sure to sign up and check their rates. They'll give you an address in America to ship to, and we will ship there. They will then take delivery and forward the packages to you.

Understand, thank you!

I have another question:

In the options of crossover, there is the Audience Auricaps which is expensive. Does this cap really make difference?

See my notes on "Upgrades" in the Pi Speakers FAQ. Inside that post, there's another link to notes about the differences in "Crossover Components." I think you'll find these useful.
