I love this app! It is the app we all wanted way back when we were in high school and in the car listening to the radio all the time. You just turn it on, and it figures out the name of the song, and the artist, and can send you to iTunes if you like!
I know I'm probably the last person to find it, but humor me. It's really a great app and I'm very enthusiastic about it.
It's for the iPhone but there's probably one for all you Androids out there too.

Been using it on my android phone since it came out years ago. Very handy as you can save your searches as well.

I've had this for a while and I love it. It even gives you the lyrics to the songs so I can sing along. Sometimes I click on it too late and don't get enough of the song to identify it. Most of the time it only needs a little piece of the music to figure it out.

Don't feel bad, Rusty. I had never heard of this app either. I am looking forward to checking it out though. I love stations that play nothing but music but most of the time I miss hearing the name of the artists.
