Hi Wayne, Hi Everybody,

I'm looking for an electronic crossover for a pair of flanking subs that I'm thinking to add to my 2pi tower. What do you think about the new Reckhorn S-1 instead of the old F-1, now sold out, that you adviced?
The new model have parametric frequency controls and active room equalization too!

http://www.reckhorn.net/pages/active-x-over.php

Thanks in advance.

Regards
Giampiero - Italy

I haven't tried that device but it looks like it would work just fine.
