I was Gogglin' for info on the CV378 rectifier, and fell over the page listed below. Quite a variety of looks, tubes, etc. from DIYers around the world.High coolosity factor - just fans the flames on my growin' jones to build another amp!
DIY Rogue's Gallery of SET Amps

Great link - Excellent looking amps - Thanks!I really dig the looks of some of those amps; The aesthetics are really important in this deal, in my opinion. A great tube amp isn't just about the sound, it's also a work of art. It's like having a tricked out custom show car.

Yeah, I can see Jesse James pimping out a 300B right now for the homies.Not all tubes, but a pretty cool Italian audio site of tricked out gear (see link)....Colin
