Hi Wayne,

Several hours ago, I attempted to order two H290C from your website. But the delivery fee is too expensive (>200\$ for UPS) if it's shipped to China.

So, I have to think about the alternative. How do you think about the H290S + adaptor with DE250? Will the profile of H290S and the insertion of adaptor affect the sound?

Go back to the shopping cart and check out the "Bongo International" link. They are a freight forwarder, and will give you much better prices than UPS.

The Eminence H290S is an exponential/radial horn. It's pretty nice - we used the bolt-on version for many years - but it isn't as good as the H290C, which is an OSEC waveguide/horn. Click the link below for more information.

H290C Horn/Waveguide
