Hi to all

I'm new in this forum, and I discovered it from my different research on speakers building.

I have to say that Pi speakers impressed me, and I decided to build my own speakers using 3PI (12") or 4 PI (15").

The second step is to use those speakers in my future Home Theater.

It would be great to get 3Pi and 4Pi building plans and crossover schematics to start my project.

Thank you.

Please decide on the model you're most interested in and let me know. I'll send plans right away.

Hi Wayne,

I've decided finally to use 4PI speakers.

Thank you.

David
