I like to lift weights but I get bored of doing it while watching TV. I was thinking I'd get a playlist going instead. What do others here listen to while working out?

I listen to rock and pop, mostly. I find that I get a better workout with higher energy music, naturally, but I haven't bothered to sort my mp3s into a workout playlist.

Lately I have been working out to a lot of '80s music. I find the upbeat pop hits that make me happy and rock out.
