Hi Everybody!

This is my first post in this forum! I am looking for a good match for my 845 SET (24W class A). I am seriously considering the 3pi/4pi projects. I think both of them would do the work but I prefer the 4pi.

I wonder if it would be possible to get the cabinet and crossover plans to do the project with local suppliers.

Thank you very much in advance.

Best regards,
JM
