Hi Wayne,

time has finally come to begin a 3pi build, so I wanted to ask if you could please send me the plans.

Thank you very much!!!!

I think I will use H290C horns, but can't decide between Eminence and B&C tweeter... Is the difference so big? Will my ears bleed with Eminence PSD?

Thank you!

You've got mail!

The PSD2002 is a good sounding compression driver. It doesn't sound shrill or harsh. But the DE250 is definitely smoother sounding.

Thanks for the answer about tweeters... So the difference is not enormous as I can read somewhere... Anyway the price for DE250 is going down in Europe, as I can see, and the not so far from PSD anymore...
