Hello, could I ask how long it would take to ship some pi4 items pls, qty 3 waveguides and qty 3 crossovers with upgraded inductor, I have these in my cart , but as someone is bringing them to me I need to know if they are ex stock or if there is a wait.  
Also if it makes it quicker I could order standard crossovers.

willie

ps A Happy and good listening New Year to all.

We assemble all crossovers to order. This is due to the fact that there are several options available. So you can expect a two to four week delivery time.

Normally we stock a few dozen waveguides at a time. We have hundreds of unfinished waveguides in stock, and we run finishing operations periodically to retain stock of ready-to-sell waveguides. However, right this moment, we have two finished waveguides in stock. So next week, we'll need to do finishing operations to bring more in.
