Hi wayne starting project
did you ever do an 2226+ 2426?

You've got mail!

And about the 2226/2426 combo, yes, that was our premium upgrade option before the DE250. It is still supported, although we do not sell the 2426 anymore. But the plans show what crossover parts are required when using the 2426 driver.

Honestly, you probably won't want to buy full kits from us anyway. You can source drivers locally; That's what most of our customers outside the USA do. Better to just buy the waveguides and maybe the crossovers from us to save shipping costs.
