Hi,

I am interested in building the 3Pi and 6Pi speakers and would be grateful if you could send me the plans.

Thanks

Duncan

Please decide which of those two models you would like best and I'll send plans right away. If you flanking subs.

The 6Pi would be my preferred option. I would be grateful if you could send the plans for those.

Are you able to tell me what size box and shipping weight would be for two H290C Horns?

I am trying to compare international shipping costs and they vary considerably so it would be good to compare with an accurate weight and size. Thanks.

You've got mail!

A pair of H290C waveguides are shipped in a 24"x8"x8" box that weighs 8 pounds.
