Hello, may I please have a copy of the 2 pi tower plans? Planning my build...

Thanks in advance

Thank you! I think you sent me the plans for the small 2 pi though. I was looking at building the towers. Can you please send the tower plans?

Thank you again!

The towers are so much larger than I realized. I live in an apartment and move frequently. I might have to settle for the 2 pi studio speakers, unfortunately. I guess if they don't have enough bass and punch to satisfy, I can always build tower cabinets later down the road. I will be driving these

with a k12-g diy tube amp from a kit I put together (8 watts/channel), and I like hip hop music so bass extension is important.
