Hi Wayne,

I am from Chile and I woulld like to build myself a pair of Pi speakers. Seems to me that because fof the low frequency range I would love the 3 Pi design but importing the speakers would me a bit expensive because of the freight costs. Can you tell me what Eminence speakers can work on that design?

Also please can you send me the plans?

Thanks!

You've got mail!

Supported midwoofer drivers are the Delta 12LF and the Definimax 4012HO.
