Hello,

Could you please send me the 4Pi plans.

Thanks

Hi Wayne,

Greetings from Chile (well... I'm in Brazil due to work now).
Same request here, I will appreciate if you can share your Pi 4 plans. Thanks in advance.

I'll build my speakers with JBL 2226H + 2446H on 2380A horn. I've been reading your PDF's and forum since a couple of weeks and playing with Spice. After several trial and error I think I have a good design adapting values for my 2446H. I have a lots of questions that I will write later in corresponding section.
It's really fantastic to see how you share your knowledge and help others. Congratulations for your great spirit of solidarity and help to the DIY world.

Hi Wayne, and thanks for the good work.

I can't understand from your shop if you ship to Europe? If not, of if it is too expensive, can you please share with me the plans of the 4pi?

I'll try to implement it by myself

Thanks!

Riccardo

I'm also interested in building the 4pi but located in Europe.

You've got mail!

We ship worldwide. The best way to get shipping quotes is to put an item in the shopping cart and begin the checkout process. It will ask you for your address and use that to calculate shipping by several methods and shippers. It doesn't ask for payment information until after it has calculated shipping costs, so this is a good way to check prices.

We also have a freight forwarder available. When you enter a non-USA address, the Bongo freight forwarder banner appears, allowing you to create an account. When you get to the checkout phase, click the Bongo banner, and create an account. They will provide a USA address, which you will then use in the Pi Speakers cart, by clicking "change address" and entering the Bongo-supplied address. This will then start a freight price recalculation in the shipping cart, and your prices will be much lower.

My suggestion is to order the waveguides from us, and possibly the crossovers. Source the driver's locally to save shipping costs.

Hi Wayne, I'm interested in the 4 Pi plans. Could you please send them?

Also, is the B&C DE250 CD with the polyimide diaphragm suitable for the speaker?

You've got mail!

And, yes, the DE250 with polyimide diaphragm is one of the available drivers.

I'd love some plans, got 4 JBL2226 drivers sitting around, not yet sure about top end as I have some Vitavox S6 units but very tempted by the DE250.....
