Subject: Eonon stereo for my car

I want to replace the stereo in my car and I found a new one that has a touch screen, built in GPS, and a back-up camera. The brand is Eonon, which I've never heard of before. Does anyone know anything about this brand and if it is worth buying?

I had to look that one up as I have never heard of it before. Really high-end looking electronics there. If you have the money, go for it. They look really good. I would make sure it comes with some sort of warranty though.

Which car do you have that it's compatible with?

It sounds like the equivalent of a smart phone in that a smartphone is more than just that. That's more than just a stereo, it's a tool.

I'll have to look more into that brand. Thank you for sharing the information.
