Subject: Big piano sound... little piano size?

Can you get big piano sound (think grand piano) from an upright piano? The wife and I are looking into pianos but we are tight, tight, tight on space. No way we can make a grand or even baby grand piano fit in our house.

In my experience, no. We had an upright piano growing up and while it had a nice sound, it certainly didn't sound like a grand or baby grand piano. I think some things just can't be replicated.
