Subject: Wayne, I'm considering building 2Pi. What's the difference between 2Pi and 2Pi tower?

I realize one is book shelf and one is tower. Does the tower have more lower end extension? I would use them full range while I refinish my 4Pi speakers.

You've got mail!

The tower version has more extended bass response. Both speakers sound nice, but the tower is definitely capable of deeper bass.

Hi Wayne. I did not receive the plans yesterday. I sent you an email with an additional email address to try. I haven't had trouble getting emails from you in the past, so I'm not sure what happened. Thanks.

I don't understand what is going on. I did't receive it on either email address I gave you in my pm. I just got emails from you last week regarding the horn purchase, and the week before on the 4Pi design. Any ideas?

Sometimes a site can get hacked and blacklisted. But that's not the case here. All blacklists show clean for PiSpeakers.com. It is not experiencing any outages or exploits.

There were no "bounce" messages in each case, both times I sent plans, to both email addresses you provided. So I do think they arrived on your server.

You might check your junk mail folder(s) and/or talk to your ISP to see if you can find out something on your end. Knowing the problem has just occurred in the last week will probably help your ISP find the trouble.
