I'm in the market for a new sound bar this year. I've been doing some research and came across one that looks promising. It's made by Vizio and is called the SmartCast sound bar. Is anyone else excited about the release of this new sound bar?

I love the idea that you can use the sound bar for all your devices by WiFi. I am also interested in the app that allows you to remotely control it from your phone. The speakers on my laptop are not that great and I would be interested in seeing how it works to cast the sound through the sound bar.
