Can anyone recommend a good combination set-up that includes all three of these? I am looking to upgrade a system in a small room.

Any help would be appreciated.

I found several receiver/player combo. Here they are:

<http://nadelectronics.com/products/hifi-receivers/C-715-Compact-Music-Systems>
http://usa.yamaha.com/products/audio-visual/hifi-systems/crx-330_black__u/?mode=model
http://usa.yamaha.com/products/audio-visual/hifi-systems/drx-730_black/?mode=model

I've heard Yamaha usually has good quality, but the website says the product is discontinued so maybe you can check the other mini system products listed. I hope it helps.

Thank you for the info. This is a good solution because my room is also small but I want to have a good overall audio system. My friends said that at least a good amp and player will be enough if the room is not too big.
