Regardless of the sound system or brand of speakers you have, is it recommended that you keep the volume at a constant level all the time? Will this give longer life to your speakers?

No. I can't imagine anyone recommending such a thing.

I think it is just logical to keep the speaker volume at a reasonable level to avoid blowing them up. Nonetheless, here is a link that I think may be helpful in making your speakers last long. <https://www.audioholics.com/home-theater-connection/avoid-blowing-speakers>
