Subject: App for removing background noise

I'm trying to do some simple, fun recordings with my friends for our music. I know the solution is to have better recording tools, but we're too lazy to get one. Is there an app for phone or computer which can remove background noise decently?

I have a friend of mine who is as curious with recordings as you are and there is this app called ClearRecordLite that I see him use on his Android phone. I am not sure if it is available on other platforms but you may want to download then check it out.

I've heard about an app called Audacity. It works pretty good to reduce noise and amplify the sound for a free app.
