Anyone into dubstep tunes? Which are your favourites? Mine are Midnight Request Line and Spliff Dub. I'm looking to build a library of tunes so let me know!

I have never heard of dubstep tunes before, at least until you mentioned it (woe unto those people who believe that they know everything).

From what I have gathered, this is some genre of electronic dance music that originated from England? I think I will now be a fan sooner than later.

Yes, it did originate there back in the 90s. I'm glad you seem to enjoy it, it sure can be quite addictive! I got into dubstep as it has similarities with techno music.
