How hard is it learning to play this instrument and how many different types can be found? I get confused with the different violin sizes or once it can't be held by hand, it ceases being referred to as a violin?

When I am attending a concert and the guitarist is really playing his instrument well, I always get a bad feeling since I had every chance to learn, while growing up and seeing my father play the guitar.

I just know of one violin type but I think it is such an interesting instrument that's easy to master.

I beg to differ. A violin isn't really that easy to master compared to other instruments out there. I have tried to learn how to play a few different instruments, and for me the easiest was the piano.
