This may not be the place for this but I have a question. Is there a way to make my TV Wi-Fi like my tablet? If there is I can access music on the TV and pick it up on my Bose speaker outside. Please tell me how to do it.

I am not very sure but I think this depends on the type of TV. I see a lot of these features in the Smart and Digital TVs but I am yet to confirm whether what you have mentioned is possible.

Is your TV a Smart TV? If it is then it's already Wi-Fi capable, you just have to go into your settings and turn it on. If you don't have a Smart TV then I'm not sure that you can do this at all.

Connect a Roku box or similar device. Voila! Wifi TV.

Smart T.V's or an up to date T.V. with Roku should have good audio capabilities. Bose is a good choice and should translate well from a good video system.

I've never really thought about this before, but now that I do, I guess I have a smart TV that came ready made with these connections, because I've never had to do anything to connect the WiFi.
