I've been playing a video game lately that has a ton of late 60's music in it. These songs keep getting stuck in my head when I'm not playing so I thought that maybe I could find a music app to listen to them. Does anyone know of an app that will play a mix of nothing but music from this decade?

My guess is that this would be hard to find. There is a radio channel that I listen to that only plays music from the 60s and 70s.

Only thing I know of is XM satellite. It has separate channels for each of the decades. Unfortunately it is about $20 per month. There is some sort of PC option though. I have no idea what it costs though.
