Subject: Pi Speakers for Home Theater?

Hi there,
I am interested in Pi Speakers for home theatre, but am only considering 1 Pi, 2 Pi and 2 Pi towers really, and wonder if anyone has any experience. My plan would be to build all channels identical. My primary concern with the 2 Pi tower is that they are rear ported, and would need them closer to the wall than the design may allow.
Any input is appreciated. Thanks in advance.

The tower design can be placed very near the wall with no ill effects. The port is large enough that airspeed is low.

There are many home theater installations shown in this forum. Do a search and you see several.
