Would anyone have the specs for an Audio Technica AT15SS?

Oops! This is so old I should have mentioned what this product does. The Audio Technica AT15SS is a cartridge and stylus from the mid eighties. I read that the SS indicates (Super Samba?), but I don't know the Freq response, tracking force, etc. Would this information be available somewhere? Thank you!!

Try Garage-A-Records and see if they can help you out. They have that cartridge listed.
