I probably could have done a Google search, but I thought you guys probably have better suggestions. Where should I go to get belts for my Rega P2?

Turntablebasics.com. Wayne; I put one of these generic belts on my Linn and found it to be just fine. Considering Linn gets 30$ for the belt and TB has them for 11$ I would not feel too uncomfortable trying one on my Rega. Look on their site and they have a cross-reference page. Should arrive in 5 days at the latest.(Don't tell any Linnie's I used it, they believe in Linn only.)

Subject: Thanks!
