What do you guys do with your old system when it's time to upgrade to something newer? Do you sell it or give it away to someone else?

Sell it, donate it and hang on to most of it for later use. Mostly though I don't have a whole system to unload at one time. Pieces only.

The first option is always to try to sell it. There are countless items when I have also given out stuff simply because trying to sell proved difficult. Upgrading comes with its fair share of challenges at times.

I never change my system all at once but rather a piece at a time and I usually just give it to one of my friends who has use for it.
