Do you prefer CDs or DVDs? YouTube and other channels like that also are playing music and showing videos. What is your favorite venue and/or medium to get your music?

Hi A constant issue..my thoughts is what ever you are comfortable listening to. From a strictly accurate point I would vote for hi-rez digital down loads.

Neither, because I think vinyl records produce the best sound. I fixed my late father's record player and I'm telling you, it's like being right with the band. The sound is layered and richer overall.

I have to agree that vinyl is the best by far in my opinion. If the records are in pristine condition, it is just like being at the concert. Somehow, digital recordings just don't give me the same feeling.
