Suddenly I found a motherlode of 2226 drivers, and need boxes to put them in! If you could supply plans for 4 Pi and 7 Pi that would be great!

Do you have appropriate corners for constant directivity cornerhorns? If so, I suggest building go and let me know. I'll send plans as soon as you decide which model is right for you.

Hi Wayne,

I do have solid corners, so the seven might be the way to go. Deep bass is not a priority, but I do value a dynamic and slightly "large" midbass.

Hi Wayne,  
Could I get the plans for the 2pi tower please?  
Thanks.
