Subject: Any recommendations for music players with Bluetooth?

I'm looking for a compatible Music Player with Bluetooth to go with QC35s and sound sport. I intend to buy both the QC35s and Sound sport but I am having trouble deciding what player would be best. I'm looking for a player that has Bluetooth, good sound quality, won't break if I'm exercising with it, and doesn't cost as much as a new iPhone. Preferably something high quality with a good interface. Any thoughts would be appreciated.
