What kind of software is best for creating music? I've only recently gotten into this venture and have only used Garage Band which came on my laptop. I've been having a lot of fun with it but want to explore some other options.

Garage Band only works for Apple products, right? I wouldn't look further if were you because I think this software just does it. It's fully equipped and I'd like to hear what other optiosns are out there.

Is there a software available made to do this for PC? I would love to see what I can come up with myself. It sounds like fun.
