What car or truck (or other vehicle) have you had that you think has the best speakers or audio quality? The 2006 Prius has terrible sound, but the Subaru Legacy has a pretty impressive bass capacity on its sound system. What do you think has the best sound quality?

I bought and installed a Pioneer and some big speakers for the trunk that the sound was absolutely outstanding. My sister said she always knew when I pulled up because her house windows would rattle.

Audi in my opinion. I currently own an Audi Q3 and the audio is great, and it can get extremely loud as well, actually has a lot of vibrations when you put it on the highest. The quality is awesome, and of course, it has Bluetooth.
