Subject: Bose speakers - looking for something small

I have been looking at the Bose speaker line. I really want something that is not so big. Wireless is good too. Does anyone have any experience with something like this?

Are you looking for something small and portable or just a room speaker that is wireless? My sister has the Bose Soundlink Revolve Bluetooth speaker and the sound is amazing for such a small thing. It's better quality than an Amazon Echo, but costs quite a bit more too.
