<http://www.mancrates.com/store/products/ammo-can-speaker-kit>

My father is a veteran and I'd like to get him one of these for Christmas depending on your opinions. What do you think of the specs? There are only three reviews. Most complain about having issues when putting it together, but my father has every doodad and tool imaginable, so he can handle the project and likely has spare parts on hand. I basically want to know if it will sound okay and whether it will last once it's built.

I'm not an expert here, but from reading the reviews it looks like it will play once it's put together. I've ordered gifts from Mancrate before and they have excellent customer service, so if something did happen, I think they would take care of it. I hope this helps.

I don't know why but I'm never comfortable buying stuff online if it doesn't have a lot of reviews. Positive or negative - I just want to know that other people have used the product I want to buy.

Yeah, I hear that, especially when something is more than \$50, I want to see reviews.

Lost the Remote, I went ahead and ordered this because I was afraid they'd run out of them since it's the holidays. I'm glad you had a good experience with their customer service. That gave me the confidence to go ahead with it.

I hope it turns out alright for you. If the customer service is as good as they say, then chances are that the product is good, too.
