Are you wanting to get started with DIY projects but aren't sure where to start, what to make or how to go about it? Work on your fundamental skills with the maker subscription box! Not all of them are tech, like there was a vegetable fermenting kit one time, but there have been rockets and retroarcade kits in the past. You can pick and choose which boxes you want. Just thought I'd share because I've learned a lot from doing a few of these.

Some of those look really cool, even the non-tech ones. They really have subscription boxes for everything, don't they? Thank you so much for sharing, I might have to give one of these a try. Which ones have you done?

I've heard of subscription boxes before but usually only in relation to things I don't care about like clothes or makeup. This sounds great. I usually enjoy anything that Neil Degrasse Tyson is a part of. Too bad I missed that box.
