I have two crossovers with the midgrade option in two MDF boxes, two B&C DE-250 and two 10 midrange drivers.

The crossovers are by Wayne and something is not quite right so the need to be figured out. I went right to a MiniDSP setup after having crossover problems and never looked back or sent them back to Wayne. The midrange drivers were switched out this year to NOS JBLs and the tweeters were switched to Be drivers last week.

No sense in leaving these parts in boxes!

Any reasonable offers accepted. Shipping is UPS from 95603

Merry Christmas!

Vince

Crossovers not for sale anymore! Just the drivers.
