RX-D702B

JVC's latest generation of A/V control receivers features a sleek profile to complement today's home theater systems. Incorporated into this beautifully designed 7.1 channel x 150W receiver you will find an abundance of features. H.D.M.I. , Wireless USB - PC Link, On Screen Display, Center Channel Alignment, Virtual Surround Back, Quick Speaker Setup and more.

This sounds more and more like SciFi! I'm loving all the new stuff!

You're right. It does sound a little unreal. But I love the world that we're living in right now, and all the new technology that has become possible. Now if only a rich uncle could leave me a couple of millions for me to get all this stuff...

I tried searching online to find a picture of this receiver, but I couldn't get one. Could you post it here if you have it? I'd really love to see what this looks like!
