Is Spotify Premium worth the money? The ads don't really bother me on the free version since it usually gives me 30 minutes ad-free music after listening to one short ad. That doesn't always happen, but it happens enough not to bother me. So what else does Premium offer? I read that you can listen to music offline. I'm assuming this has to be music you've downloaded beforehand. Is that right?

I already use other services that I'm happy with so I've never delved into Spotify. However, I noticed that they offer a free trial for 30 days, which should give you plenty of time to see if it's worth paying for.

That's what I was going to say Leo, you could always try the free trial. Either way, it's not too expensive, but if the ads don't bother you, I'm not sure it's worth it. You do have to download music in order to hear it offline. You can download up to 3,333 songs.
