I'm starting a playlist on my You Tube channel (I think it's on my channel) and I would like some pointers. I'm doing this on my Samsung 8. Like, what is the easiest way to look at or play my list? Right now I can only do that after I add another song.

The only way that I know how to see my playlist is to click on my avatar/username. It takes me to the page. I'm sure someone else knows a speedier trick.

That's what I do too. It also has the option of seeing liked video's, which I never understood. If you like a video, you put it on your playlist. Right?
