I thought USSpeaker or Parts Express carried the H290C, but they only have the screw-on S version or the B version, and the B is slightly smaller overall.

Is the C version the same size as the S, namely 11.7"W x 6.6" x 6.0"?

The B version is 11.4" x 6.5" x 5.9

Why is the C version hard to find out there now? USSpeaker has the H290, which was discontinued years ago, or is what they sell really the C version?

Here's the link:
<http://www.usspeaker.com/H290-1.htm>

The H290B and the H290S are both radial horns made by Eminence. The H290C is an OSEC waveguide, made by us. It's designed to be an upgrade for the Eminence H290, and has the same baffle cutout and mounting dimensions. For more information, see the link below:
H290C Horn/Waveguide
