My love for audio actually started because I love electric guitars! There's so many songs that have an amazing guitar rif in it that I love listening to with the audio on high! My current favorite is by Brothers Osborne called "Stay a Little Longer". It has a long rif in it that I love blasting!

For me, the Stones did some of the most recognizable rif's in rock & roll. Can't You Hear Me Knocking has that searing solo by Mick Taylor that just soars. You bet, neighbors can hear me playing that number.
