I just bought a Thorens TD-145 the auction stated that it had a MA 2002 needle which I can't find any info on. The seller is out of town until the weekend and will be sending me the actual cartridge info then. Any recommendations for a good reasonably priced cartridge for use with the stock arm. The turntable will be feeding a Carver receiver. From what I've read the Orotophon Super 20 or Super 30 seems pretty good. ThanksLe

I love the om-20 and 0m-30, but recent price increases have made them a little less attractive. Best cartr for the buck for a 145 is the Shure m97xe. Check Amazon for an amazing price.D

Actually the om-20 is available for 119 and the 0m-30 for 169 online shipping included.
